

Chapter Graphics Project Assignment: Guidelines

Creating Graphics

Graphics are like “snapshots” of a chapter. Good readers **see** or **visualize** what they are reading. Good writers **describe** these mental images and **support** their ideas with evidence and examples from the text.

Your task: Create a graphic for a significant chapter in the book.

Follow the steps below to accomplish your goal.

Step 1: Discuss

Have a conversation with your partner and decide on a significant chapter in the book.

Next, choose **four** significant quotes/passages from that chapter. *These quotes should represent parts of the chapter that are **important** in terms of character, big ideas, themes, author’s craft, and so on.*

Step 2: Quote

Copy the quotes/passages—place one quote in each corner of the paper (**four** quotes in total).

Be sure to include the **page number from which the quote was taken.*

Step 3: Analyze

Underneath each quote, explain what the quote means and **why** it is **important**. In other words, analyze. **Explain** how the quote **connects** to the overall big idea/theme of the chapter. Stretch your analysis by using **prompts**.

Step 4: Sketch/Draw

Sketch/draw an image (mentioned in the chapter) that could represent the chapter as a whole. *This image should be drawn in the **center** of the page.*

Use at least **three** colors to illustrate your image. *Each color should represent an important idea/emotion/character trait, and so on expressed in the chapter.*

Step 5: Explain

Explain what each color represents. Use **prompts** to describe the significance of each color.

Step 6: Title

Give your graphic a **creative** title.

Use a **literary device** in your title.
